English

Projects

MyApartments — App that scrapes apartment listings from Yad2, stores the data in MongoDB, and presents it via a React UI and a FastApi backend, deployed using Docker Compose. ([GitHub](#))
Menu Optimaztion - College internship project in collaboration with an Italian company. ([GitHub](#))

Professional Summary

Automation Team Lead at Mizrahi-Tefahot Bank, specializing in building infrastructure for automated pipelines and CI/CD. Experienced with Jenkins, Docker, Bitbucket/Git, Playwright, and mobile test automation using Appium. Proficient in TypeScript (including React), Kotlin with jetpack compose, and recognized for leadership and strong problem-solving abilities. Currently seeking fullstack developer.

Experience

Matrix - Automation Developer – Team lead

Mizrahi Tafhote – Lod Israel
02/2025 – Today

- Designed and built automated testing infrastructure using TypeScript and Java with WebdriverIO and Playwright frameworks.
- Maintained and developed automated test pipelines using Docker.
- Developed and maintained automated tests for web, APIs, and mobile applications.
- Team lead for a group of automation engineers working on test automation for web and mobile.

Matrix - Automation Developer

Philips – Ra'anana, Israel
02/2024 – 02/2025

- Designed and built C#-based automated testing infrastructure.
- Integrated automated test suites into Jenkins pipelines, ensuring seamless post-build test execution and reporting.
- maintained automated tests using SpecFlow and C# to support scalable CI/CD
- Successfully achieved KPI goals

Projects

myControlApp – IDF division-wide scheduling management app built with Kotlin/Jetpack compose CI/CD pipeline implemented using GitHub actions with bash scripts and docker ([GitHub](#))
Facebook Management App – Developed a user management application using WinForms C#, Facebook API, and design patterns to enhance maintainability and scalability. ([GitHub](#))
xParty – Built an interactive map using osmdroid opensource maps API & Firebase in Kotlin for event visualization. ([GitHub](#))
