SUMMARY

Software developer with 3.5 years of hands-on experience. Over the past year, built distributed, microservices-based systems in production using NestJS, Node.js and TypeScript, with event-driven messaging over Kafka, caching in Redis and React on the frontend. Before that, 2.5 years building test automation frameworks from scratch and leading a three-person automation team. Recent focus on integrating LLMs, MCP and AI agents into the development workflow. Seeking a position as a Fullstack Developer.

EXPERIENCE

Fullstack Developer – Matrix – Mizrahi Tefahot Bank 08/2025 – 08/2026

- Developed and maintained scalable backend microservices in NestJS, TypeScript and Node.js.
- Designed and implemented BFF services using Kafka for asynchronous messaging and Redis for caching.
- Built and consumed REST APIs between backend services and React-based frontend applications.

Automation Team Lead – Matrix – Mizrahi Tefahot Bank 08/2024 – 08/2025

- Led a team of 3 automation engineers covering web, API and mobile test automation.
- Owned and improved the automation frameworks used across the group.
- Planned automation sprints with QA managers, reviewed technical solutions, and created and assigned Jira tasks by project priority.

Automation Developer – Matrix – Mizrahi Tefahot Bank 02/2024 – 08/2024

- Built automated test infrastructure from scratch using TypeScript, WebdriverIO and Playwright.
- Developed and maintained automated tests for web, API and mobile applications, integrated with Jenkins pipelines and Docker.

Automation Developer – Matrix – Philips 03/2023 – 02/2024

- Maintained and extended a C# / SpecFlow automated testing infrastructure, including new framework components and capabilities.
- Built Python tools and scripts for SSH-based communication with VMware virtual machines.
- Wrote SQL queries against Microsoft SQL Server to retrieve and validate test data.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, Java, Python

Backend: Node.js, NestJS, .NET Core, Spring Boot

Frontend: React

Messaging & Caching: Kafka, Redis

Databases: Microsoft SQL Server, MongoDB

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, CI/CD

Test Automation: Playwright, Selenium, WebdriverIO, Appium, SpecFlow, Jest

Tools & Scripting: Git, Jira, Bash, PowerShell

AI: LLM integration, RAG, MCP (Model Context Protocol), AI agents

PROJECTS

WebTradeTracker – Trading journal web and mobile app: live stock prices, trade logging and 5-year price charts, with JWT authentication. *NestJS · React · .NET* • github.com/Dimavo42/WebTradeTracker

DocuMind – Local AI document assistant: upload PDFs and ask questions in plain language; a RAG pipeline retrieves the relevant chunks and every answer cites its source pages. *Spring Boot · React · PostgreSQL/pgvector · Ollama* • github.com/Dimavo42/DocuMind

AIGenerator – Cross-platform launcher and desktop GUI for running local LLMs; installs the runtime, builds a virtual environment and starts the app in one step. *Python · Ollama* • github.com/Dimavo42/AIGenerator

EDUCATION

B.Sc. Computer Science, Machine Learning specialization • Holon Institute of Technology (HIT) 2020 – 2023

Courses: AWS Academy Graduate – Advanced Cloud (40h) • Angular – Udemy (60h) • .NET Core – Udemy (50h)

MILITARY SERVICE

Combat soldier • Paratroopers Brigade, Israel Defense Forces 2014 – 2017

LANGUAGES

Hebrew (native) • Russian (native) • English (professional)
